## 8. CASE BY CASE

The agent passes you this grid puzzle and informs you that you're looking for a six-letter answer word. The rules are as follows: each square must contain one uppercase and one lowercase letter from the selection below. Each letter must appear only once in each row and column, and furthermore each combination of upper and lowercase letters must be unique. The 16 combinations are shown below: cross them off as you work out where each is placed in the grid. Uppercase letters are always placed before lowercase letters. Some squares have been shaded. Once the puzzle is complete, rearrange the letter pairs in these squares to find your answer word.
