### 3. THREE FOR ONE

The agent now instructs you to solve each of the first three puzzles to find in each case a different common five-letter word that does not repeat any letters. A pale green square indicates the letter appears in the answer word but in a different position, a yellow square indicates the letter appears in the answer word in the same position, and a square without shading indicates the letter does not appear in the answer word. Use the three words you deduce as clues for the fourth puzzle to then enable you to reveal your answer word.
